SECURITIES AND EXCHANGE COMMISSION OF PAKISTAN

Strategy, Development and External Relations Department

Press Release

SECP to start on-site inspection of brokerage houses

ISLAMABAD, August 9: In order to ensure a fair and transparent capital market, the

Securities and Exchange Commission of Pakistan (SECP) has developed an inspection policy

to ensure regulatory compliance by the participants of the securities market. Additionally, an

inspection manual and standard operating procedures for the implementation of the policy

have also been developed. All the statutory requirements along with best practices have been

included in these documents.

The SECP aims at strengthening market oversight and enforcement through a blend of off-

site reporting and on-site inspection. The off-site element comprises of periodic reporting by

the regulated entities, including the three stock exchanges, which will then be assessed and

analyzed to identify potential risk areas and to determine the status of compliance. On-site

inspections will focus on policies, procedures and internal control systems, established by the

regulated entities, to assure compliance and to assess their financial health. The SECP intends

to conduct inspection of members of the stock exchanges on a regular basis.

A strong inspection programme is in the best interests of the regulated community as investor

confidence is predicated on their trust in the market professionals who handle their

investments, as well as in the regulators who supervise the market and related activities.

The inspection programme is aimed at promoting a culture of compliance and regulatory

practices that would not only be beneficial to the market intermediaries and investors but

would also facilitate overall growth and development of an efficient capital market.
