Required software specifications/features

1. Expanded Session concept

- Any comparison can be saved as a session, not just folder comparisons
- Plug-ins are now built-in session types
- Source control integration
- Saved sessions can be organized in folders
- Auto-saved sessions

2. Fully unicode enabled

- Unicode filenames now supported as well as unicode file content

3. Interface Improvements

- Tabbed interface for session views
- Handy "home" view for launching and managing sessions
- Layout of open sessions can be saved, restored
- Built-in "Check for updates"

4. Folder compare features

- Folder icons colors now match your preferences
- Multiple operations can be queued
- File actions now respect filters by default
- Dedicated folder sync session
- **Touch** and **Attrib** commands can now recurse through subfolders
- **Attrib** supports Unix attributes
- New **Ignored** command flags mismatched file as OK
- New **Move to Folder** command
- Flatten folders lets you compare differing folder structures
- Alignment overrides

5. Text comparison features

- Full in-pane editor with dynamic re-comparisons
- Syntax highlighting
- Adaptive gutter buttons for copying sections
- Unlimited undo after save
- Grammar-based comparison rules
- Independent file formats for each side of the comparison
- New **Ignored** command flags mismatched sections as OK
- Multiple bookmarks
- Hex display option for line details
- 3-way text merge
- Text Replacements

6. Improved FTP support

- FTP profiles, selectable per session
- Multiple simultaneous connections
- Built-in support for secure FTP protocols (SFTP and FTP over SSL)
