SECP Overview

The Securities and Exchange Commission of Pakistan (SECP), setup in pursuance of the Securities and Exchange Commission of Pakistan Act, 1997 is an apex regulatory authority mandated to regulate and supervise the Pakistani securities markets, corporate sector, insurance industry and non-banking financial sector, etc. The head office of the SECP is in Islamabad and branch offices are located in Islamabad, Peshawar, Lahore, Faisalabad, Multan, Sukkur, Karachi, Quetta, and Gilgit.

Background

SECP is running an automated workflow system called eServices, since year 2008. It is a business process management framework based on IBM technologies and provides the base to capture required information from external stakeholders in the form of electronic forms. The submitted information is accepted, after validation by concerned officers, and is then made available for analysis through reporting modules. Currently 80 business processes are automated through eServices.

In line with the governments declared vision of "doing business" reforms, and to provide a world class service platform to the corporate and capital market participants, SECP wants to modernize and digitize its entire operational spectrum and automate an additional approximately 150 business processes for end to end automation

In addition with the advent of new technologies and new user requirements that cannot be addressed in the current system, SECP would like to replace the existing system. Majority of the business processes including those which are automated and part of the current system have been documented by the relevant departments.

Objectives:

SECP aims to achieve business process automation of approximately 230 business processes. For this purpose, consultancy services of a third party are required to:

1. Review the existing system
2. Review the Business Process Documents for all the business processes
3. Meetings with end users and IT personnel
